SKYLIGHT/SLIDING PERSPEX WINDOW

Skylight sheets and Perspex windows enable light into your shed without the need for electricity. Made from tough fibreglass, this sheet is to be installed when erecting the roof of your shed.

SUITABLE FOR	MODEL
Garden Sheds Skylight: 1610mm (L) x 330mm (W)	SKYSH
Sliding Perspex Window: 730mm (L) x 230mm (W)	SLPW

- » Garden Sheds Skylight: not compatible with smaller sheds (1545mm deep or less)
- » Maximum of 1 perspex window per 2.3 meter panel
- » Sliding perspex window made from tough acrylic sheeting and PVC frame
- » Manufacturer's 10-year warranty.

CYCLONE KIT

Cyclone Kits upgrade the wind rating of your shed to C1.

Most Absco Sheds are approved to Australian Standards AS11790.2.02 non-cyclonic conditions (N2)*. Installing a Cyclone Kit will upgrade your shed to C1. Please check the wind rating carefully and check the requirements with your local council before purchasing.

MODEL	CYCLONE KIT
1.5mW x 1.5mD Sheds	CYC15
Space Saver Range	CYCSKRSK
Premier Range	CYCGK
Regent Range	CYCRK
Utility Range	CYCWKUTK
Workshop Range	
Highlander Range	CYCHK

- » Each frame kit is compatible with multiple shed sizes, as our sheds range in size from 1.5m to 6m. Cutting the frame to size is necessary for some models.
- » Installation of the Cyclone Kit is required during the garden shed assembly for the Regent, Utility, Workshop and Highlander Cyclone Kits. The Space Saver, Premier and 1.5m Cyclone Kits can be installed after shed construction.

“ We have a block of land in Mission Beach with an Absco Shed on it. Our shed has survived both Cyclone Larry and Cyclone Yasi and we couldn't be happier or more relieved to find it still intact thanks to the Absco Cyclone Kit installed. ”

PATRICK, MISSION BEACH QLD
CUSTOMER TESTIMONIAL

HOW TO CHOOSE AN ABSCO PRODUCT

STEP 1 - SIZE & COLOUR

Measure the space you have available and what colour would suit your surroundings. Absco products are available in Zinalume® and COLORBOND® colours, with Surfist® trim unless otherwise stated.

Recommendation: Lay a concrete slab prior to building your shed. When laying a concrete slab, ensure there is a rebated edge 25mm deep, 75mm wide, around the perimeter. This will help water egress from the base of the shed.

STEP 2 - ROOF & DOORS

Absco sheds come with either a Gable, Skillion or Flat roof. Some ranges come with single, double, hinged, roller or sliding doors. Space Saver sheds have a sloping skillion roof designed specifically for small areas. Both Premier & Regent sheds have a gable roof and use a roof ridge beam. Premier & Regent sheds come with hinged doors.

STEP 3 - CYCLONE KIT

Most Absco sheds are approved to Australian Standards AS11790.2.02 non-cyclonic conditions (N2). See table above on how to choose the right cyclone kit for your shed if you wish to have a higher wind rating than N2. If you reside in a cyclonic region please note the information in the guidelines prior to making your purchase.

Warning: It is recommended that new Galvanized mesh on your chicken coop should be weathered for two (2) months or scrubbed with a mild acidic solution such as vinegar, then rinsed with water before being used in bird housing appliances.

CYCLONIC REGION GUIDELINES

- 1 SELECT PRODUCT
- 2 ABSCO PLANS
- 3 BUILDING APPROVAL
- 4 PURCHASE
- 5 CONSTRUCTION

Most Absco products are suitable for construction in Queensland non-cyclonic regions (N2) but are not suitable for construction and will not gain council building approval in some cyclonic regions within 100km of the northern coastline of Australia.

The wind classification of your property depends on Wind Region, Terrain Category, Shielding Factor, and Topography Effect. This information is outlined in our Cyclone Kit Upgrade Guidelines & Classifications document.

For more information on wind classifications in your area, please check with your local council before purchasing an Absco product.

Documentation:

For construction in cyclonic regions it is essential that you apply for and attain written council building approval before you purchase.

Once you have selected your Absco product, email the model number together with your site address to:

admin@absco.com.au

We will email you the corresponding engineering documentation that you will need to submit for your building permit.

Absco will not accept any responsibility or liability, for any Absco product supplied or constructed within a cyclonic region prior to receiving a written building approval that may subsequently fail to receive final building certification.

Absco Sheds have undertaken every effort to ensure all images and product information are correct and relevant at the time of printing. We reserve the right to correct printing errors at any time without notice. Images included in this catalogue are for illustrative purposes only and may not show all or correct colours, product features and/or optional extras. Absco Sheds - April 2025
